PERIPHERAL ARTERIAL DISEASE

Interventional Radiologists are helping patients with peripheral arterial disease get back in circulation.

Do your legs hurt when walking – then feel better when you sleep? Do you have leg numbness or even the “ash” heel? Peripheral arterial disease (PAD) can have many symptoms, all caused by arterial clogging. An increasing number of PAD patients are walking pain free due to Interventional Radiologists – specialists who pinpoint and perform minimally invasive treatments that restore circulation.

Know your options. Today you have neurological choices and direct access to these specialists. Visit www.SIRonline.org for more information or a directory of Interventional Radiologists in your area.

Enhanced care through advanced technology

SOCIETY OF INTERVENTIONAL RADIOLOGY

STROKE

The number 3 killer now has a number 1 enemy: the Interventional Radiologist.

Now, minimally invasive, targeted techniques provide hope for stroke victims and patients at risk. Using their expertise in imaging, Interventional Radiologists who specialize in neurological procedures guide a catheter into the brain to administer a clot-busting drug directly to the site. If given early enough, this restores blood flow and often reverses the effects of the stroke. In high-risk patients, Interventional Radiologists also identify and treat blockages in the carotid artery, preventing strokes from even happening.

These neurological techniques are just two of the many ways Interventional Radiologists are advancing medicine and improving outcomes for a range of patients with life-threatening conditions. Visit www.SIRonline.org to learn more about the risk factors and warning signs of stroke or for a directory of Interventional Radiologists in your area.

It's not a demo. It's an experience!

The Canon PROJECTOR Experience Will Open Your Eyes to Better Image Quality.

Anyone can demo a projector. But Canon's new REALiS Compact Installation Projectors aren't just any projector. With four models to choose from, including two short throw, these REALiS projectors will impress you with amazing color and detail, unique features that maintain brightness throughout the zoom range and provide installation flexibility, super low power consumption, and more. We've even made it easier to compare Canon quality for yourself by calling your local dealer, contacting your Canon salesperson or visiting www.TheCanonPROJECTORExperience.com.

**Set
your
sites
higher.**

For those who are set on success, there's only one direction to go.

As one of your most important business tools, your web site should increase profits, strengthen your relationships with retailers, be able to track orders, sell, help your sales reps do their jobs more effectively, make operations run more efficiently, and work smoothly for everyone who matters to your business.

And no one develops web sites that function on as high a level as Redscope. So, no matter what type of web site you have now—site unseen—we know we can make it better.

INOPERABLE. INACCESSIBLE.

Untreatable.

THIS IS WHAT JIM HEARD BEFORE

we started treating his cancer.

With difficult to reach tumors, the new TomoTherapy radiation treatment at Altru Cancer Center is producing some amazing results. It can be used on prostate, breast, lung, brain, head and neck, lymphomas, even some leukemias.

And because of its pinpoint accuracy, there is little risk to surrounding tissue or vital organs. Side effects are greatly reduced.

In North Dakota, Altru is the only hospital that offers the new cancer treatment, TomoTherapy.

TomoTherapy is unique because it surrounds the entire body during treatment. It's a more concentrated form of radiation, too, which makes it more effective for treating tumors.

The end result - TomoTherapy is offering more hope for cancer patients like Jim.

For additional information please visit altru.org/tomotherapy, or call 701-780-5860.
