

Vector Conversion

Before

Vectorized

Vector Conversion: Any raster image if legible can be converted in vector redraws by our expert artists. We can take your pixelated bitmap image such as a **jpg**, **tiff** or **png** file and we will redraw it into a **High-Quality Vector Graphic**. Vector images are drawn using mathematical relationships between points and paths, therefore enabling them to be scaled up to **ANY SIZE** without any loss in quality! No more jagged edges or blurry pixelated graphics to worry about!

Note: The service provided with a next business day turnaround time.
